Opinion

That's a swing of 162,520 votes from Kerry to Bush -- more than enough to alter the outcome. He placed the country under martial law in 1972, silenced the media, and used violence against those in the opposition.

This Is How They Will Suggest the Election Was Stolen

Just the mere possibility of being arrested and thrown in prison for tampering with elections might have a chilling effect on the small clique that manipulates the results.
