Scale ; 1 inch to 50 miles. Forks Creek and Departure Creek , a long with its tributaries West Departure Creek and Balkam Creek , drain the remainder of Scapa township and much of Bonis town ship. A preliminary report on the potash industry of Nebraska: Nebraska Conservation and Soil Survey, Bull.

## Full text of Mining World Index of Current

A scientific argument which is wholly lacking in quantitative support cannot be satisfactory ; but on the other hand a highly developed mathematical treatment -which rests upon unsound premises is usually much worse than none, — T. W. Epigenetic mineralization also is typically localized along low displacement faults and fracture systems e.
