## Archaeology of Nihoa and Necker islands [FACSIMILE]: Emory, Kenneth Pike, 1897

Papers of the Peabody Museum of American Archaeology and Ethnology, Harvard University, vol. The summer solstice marked the transition between Makahiki four months of peace and harvest and Kau wela eight months of production. Partial skeletons of men, women, and children have been found on the island, and two burial sites located.

## Mystery Islands

Geochemical analysis of additional archaeological samples, better geological characterization of the islands, and stylistic and functional analysis of tool and implement forms are all needed to more conclusively answer this question. The journey of spirits to the afterworld in the west, toward the setting sun would have been shorter from this western outpost than from the islands to the east.
