## Circulating vitamin D, calcium and risk of cerebrovascular disease: a systematic review and meta

Author Information Corresponding Author: Ross C. Preventing neurologic deterioration related to an evolving stroke 72-hour window Stroke progression occurs in 20% to 40% of hospitalized patients with ischemic stroke, with the risk being highest in the first 24 hours.

## Stroke Prevention and Treatment in Sickle Cell Disease

MEASURING THE BURDEN OF INJURIES—METRICS BASED ON MORTALITY Counts of the absolute numbers of injury deaths and their relation to other causes of death have been one of the primary means of quantifying the burden of injuries. Updated guidelines for evaluating public health surveillance systems: recommendations from the Guidelines Working Group. Somewhat different patterns of the burden of injury emerge when counts of deaths are translated into rates by dividing by an appropriate denominator.

## Cerebrovascular Accident

Schneider LS, Tariot PN, Dagerman KS, et al. Americas: decriminalize personal use of drugs; reform policies to curb violence, abuse.

## Cardiovascular Disease Among Women Residing in Rural America: Epidemiology, Explanations, and Challenges

Risperidone treatment in elderly patients with dementia: relative risk of cerebrovascular events versus other antipsychotics.
