## Concern over climate and the environment predominates among these publics

Government subsidies—justified by the social costs of carbon emissions—for renewable energy have also played a role.

## Concern over climate and the environment predominates among these publics

Above all, we need to restore—through government and other means—our trust in collective action. Boom for home solar ahead? They are working to build flood defenses, plan for heatwaves and higher temperatures, install water-permeable pavements to better deal with floods and stormwater and improve water storage and use.

## Concern over climate and the environment predominates among these publics

Keith Smith and Adam Mayer. As evidenced by their activism on this issue—this past week, millions marched in countries around the world to protest inaction around climate change—young people are especially concerned with the environment.

## Climate Change

Public support for expanding the use of oil or coal is considerably lower. Public priorities on environmental protections have risen over time.

## Mitigation and Adaptation

This group is composed primarily of Democrats 72%, but roughly a quarter 24% is Republican.

## The challenging politics of climate change

To the extent there are political differences among Americans on these issues, those variances are largely concentrated when it comes to their

views about climate scientists, per se, rather than scientists, generally. Over the years, the steady flow of information about the release of hazardous chemicals into the environment has had many positive effects on regulators, environmentalists, and industrialists. The 2014 Asia Barometer survey found a similar pattern.
