Just as habits of indulgence always stand opposed to habits of abstinence, so too does every principle of action have its opposite principle.

By fifteen, Alexander was apparently already serving as a deputy military commander for his father, a circumstance undermining, if inconclusively, the judgment of those historians who conjecture a longer period of tuition. Habituation thus does not stifle nature, but rather lets nature make its appearance.

#### Aristotle Onassis

So, as a group they must be re-interpreted and systematized, and, where that does not suffice, some must be rejected outright. His dialogue , for example, reflects the Platonic view of the as imprisoned in the body and as capable of a happier life only when the body has been left behind.
