Decadal Change in Groundwater Quality

Establishes site specific Class III groundwater quality standards for chloride at two dedicated nature preserves, which are wetlands, pursuant to 620.

Groundwater Quality

A septic tank may be divided into two parts to keep the sludge at the bottom and the scum on the top from draining out.

Decadal Change in Groundwater Quality

The objectives of the Ambient Groundwater Monitoring Program are: to assess and report on the quality of the state's groundwater; identify long-term groundwater quality trends; characterize naturally occurring or background conditions; and establish an initial statewide comprehensive groundwater quality baseline for future comparison.

New Mexico Environment Department Ground Water Quality Bureau

If we sampled more frequently, we would have to sample fewer wells.

New Mexico Environment Department Ground Water Quality Bureau

If not treated, the final outcomes are heart disease, stroke, cancer, diabetes, coma, and death.
