Diagnosis and Screening for Obesity

MMWR Morb Mortal Wkly Rep.

Obesity and Managed Care: A Role for Activism and Advocacy?

. In the Maastricht region of the Netherlands, for example, a DMP for asthma and COPD 6. Added by Acts 2013, 83rd Leg.

Health and Economic Costs of Chronic Diseases

Assessment generally involves comparing a child's BMI level to age- and sex-specific target values. The implementation plan must include: 1 specific staffing patterns by function for all operations, including enrollment, information systems, member services, quality improvement, claims management, case management, and provider and recipient training; and 2 specific time frames for demonstrating preparedness for implementation before the date on which the managed care organization plans to begin to provide health care services to recipients in that region through managed care.

Healthcare Obesity Prevention Recommendations: Complete List

Department of Health and Human Services. Although not cost-saving, this benefit design and behavioral economic approach employing loss aversion reduced the rate of increase in direct medical costs over one year and appeared to be cost-effective, providing good value for money.
