policy makers, scholars, scientists, parents, and society to make sure young people are healthy, happy, safe, and productive is not new. In general, we know that the availability of youth development focused institutions and programs vary with neighborhood socioeconomic status. Greater limits on behavior may also be necessary in dangerous neighborhoods, where the costs of stepping outside the bounds of authority are higher Steinberg et al.

It shifts the debate from s Social settings have enormous power to promote or hinder positive youth development. Evidence for the importance of this feature comes from research on multiple settings. We include this feature of settings not so much to outline a particular set of social norms as universally critical but more to highlight the significance of social norms for development in settings such as community programs for youth.
